

## What is Cards?

### What is AD/HD?

AD/HD, or Attention Deficit / Hyperactivity Disorder, is a neurological disability which affects a young person's concentration, impulse control and time awareness. People with this disability will be impulsive, forgetful, easily distracted; they will interrupt frequently, and will not pay attention. Some will be Hyperactive.

Young people with AD/HD need a consistent approach, frequent and immediate feedback, to learn the consequences of their actions, to be rewarded for good behaviour.

**Please be patient**

More information on this learning disability can be obtained by telephoning OAASIS on **0800 902 0732**
